

VIBRATION MEASUREMENT & MONITORING

APPLICATIONS IN INDUSTRIAL FIELDS:

(GEARBOXES ,PUMPS,FANS,MOTORS , GENERATORS , PAPER MILLS
STEEL MILLS ,STEAM TURBINES,GAS TURBINES, GAS CIRCUALTORS
,ENGINES,PRESS/MACHINE TOOLS,COOLING TOWERS
COMPRESSORS ,CONVOYERS ,AIR HANDLING UNITS,DRYERS
VIBRATING SCREENS) .Construction vibration monitoring ,Bridge and railways infrastructure
,Large civil structure ,Earthquake monitoring, Tunnels ,Oil and gas pipelines ,Lifts

Products:

- (All Types of PZ Accelerometers For All Applications ,
- Portable Devices Vibration Analysis,
- Balancing and Condition Monitoring &Alarming,
- Signal conditioning System,
- Shaft Alignment,
- Alignment of Bearing Pockets and Diaphragms on Turbines,
- Software,
- Internal Alignment of Engines, Compressors, Pumps
- PC Measuring System ,
- PC alignment systems
- PC Balancing System ,
- Seismic Monitoring Systems
